In this photo, Kayla Garrett, (Pickett County High School), pictured left, and Kensley Nash, (Upperman High School), on the right, visited the FCC in Washington, D.C. TECH TIP RECOGNIZING SCAM POP-UPS ONLINE

Twin Lakes wants you to know we will never post an ad or pop-up asking for your personal account information. This is done by scam artists or hackers that use phishing to try to steal your information.

How does phishing work? Phishing is typically done through e-mail, ads, pop-ups or websites that look similar to sites that you already use. For example, you may receive an e-mail that looks like it is from your bank asking you to confirm your bank account number, when it really is not from your bank.

How to avoid phishing attacks? Be careful anytime you receive a message from a website, e-mail or pop-up asking for your personal information. If you get this type of message, and it appears to be from Twin Lakes, know that we will never send unsolicited messages like this to you. If possible, do not click the link in your e-mail or the pop-up. We hope this tech tip has been informative and will help keep your personal information safe.
